Subject: Pipeline sitework table
Attachments: FY18 Pipeline Operations AOA priorities.pdf

All,

Following our meeting this afternoon I deleted the \$0 line items (ongoing tasks) and sorted the remainder by site name to make it a little more manageable. As it turns out, there are only 17 sites (by my count) seeking Pipeline dollars in FY18. There are numerous discrete tasks for some of the sites, but I think this is a very manageable universe. I'd like to get to the point where we have a prioritized list of work that we can move from alternate to approved as additional funds become available. Please review the sites for your Unit, update SEMS as necessary, and familiarize yourself with the tasks and their relative priority.
